

Ship-to Location Change

Version 6.7.0

By Musick International, Inc.

Compatibility

Compatible with Sage 300 2020, 2019, 2018, 2017, 2016, 2014, 2012, v6.0.

Overview

Provides the ability to change Accounts Receivable Ship-to Location codes.

Installation

Download and install the latest release of either FixIT Professional or DataCHECK. In the folder where FixIT is installed (default is C:\FixITcc), run the install program “ShipToLocationChangeInstall.exe”. We recommend using “Run as Administrator”.

Connect FixIT Pro or DataCHECK

The Ship-to Location Change requires the database connection to be created in FixIT or DataCheck. Start FixIT and verify the connection to the company. If the company is not listed on the “Validate” screen, select the “Locate” icon on the left toolbar. Change to “Locate Data using FixIT Path” as the default. Click “New” to add a new connection to the company database. “Apply” the changes and verify the database is available.

Running Ship-to Location Change

Before running the Ship-to Location Change, verify the company database is available in FixIT Professional. Launch the ShipToLocationChange.exe from “Start” – “Programs” – “Musick International” – “Ship-to Location Change”.

Ship-to Location Change v6.7.0 2019-10-15

Select a Company

[SAMLTD-67] Sage 300 2020 v6.7A - Sample Limited Data - 67A

Mid-way warehouse	1500	MID	
Postal Outlet	1240	POSTAL	
Warehouse	1200	WAREHS	
West Oakland Warehouse	1105	WEST	
Break Away - West Warehouse	1580	WEST	
Yamate Warehouse	1500	YAM	

Change Ship-to Locations

Enter the “New Code” for each Customer and Location. Location codes may contain uppercase letters and numbers. Symbols and spaces are not allowed. Once the numbers are entered, click the “Change Ship-to Locations” button to process the changes.

At this point a prompt is displayed to verify a backup has been made:

BACKUP REQUIRED

 **This program will make changes in your database. These changes cannot be undone. You must have a valid backup before continuing.**

Note: Please run the A/R Data Integrity check and verify the customer data before doing any processing. If you receive any error messages or the Ship-to Location Change does not complete, do NOT use this database. Please restore from a backup.

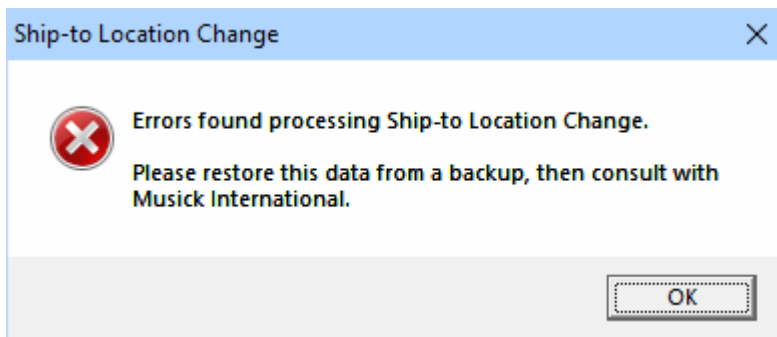

**If you have any problems, please contact Musick International immediately.
Support@Musick-Int.com or 719-395-4124**

Do you have a current backup of the database?

Yes No

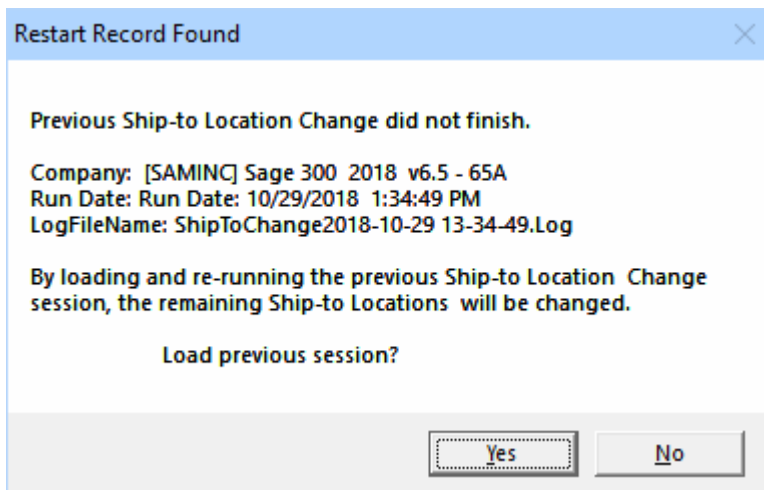

Canceling the Process

If something interrupts you, you may need to cancel the process. Doing so will display this message:

Restart Found

When the Ship-to Location Change is canceled or interrupted, the following message will display:

It is recommended to select “Yes” to re-load the previous session and complete the process. As long as no changes have been made to the database, re-running the restart information will complete changing the ship-to locations previously in progress. Selecting “No” should only be considered if the database was restored from a backup. Otherwise some tables in the sage 300 database have the new ship-to location codes and other tables have the original codes.

Thank You for selecting Musick International.
